Miguel Biron Lattes

✉ miguel.biron@stat.ubc.ca
🌐 https://miguelbiron.github.io/

Education

2018–present	**Ph.D. Statistics**, *University of British Columbia*, Vancouver, BC
supervisors:	Drs. Alexandre Bouchard-Côté & Trevor Campbell
2014–2015	**M.A. Statistics**, *Columbia University*, New York, NY
project:	Analyzing call center data using self-exciting point processes
2006–2012	**B.Eng.Sc. Industrial Engineering**, *University of Chile*, Santiago, Chile
supervisors:	Drs. José Miguel Cruz & Cristián Bravo
note:	Considers also a professional degree in Industrial Engineering

Academic Experience

2019–present	**Research Assistant**, *UBC Statistics*, Vancouver, Canada
	Supervised by Alexandre Bouchard-Côté & Trevor Campbell.
2019–2020	**Teaching Assistant**, *UBC Statistics*, Vancouver, Canada

- STAT 251 — Elementary Statistics
- STAT 302 — Introduction to Probability
- STAT 450 — Case Studies in Statistics

Publications

2023	**Biron**-Lattes, M., Bouchard-Côté, A., & Campbell, T. Pseudo-marginal inference for CTMCs on infinite spaces via monotonic likelihood approximations. *Journal of Computational and Graphical Statistics*, 32(2), 513-527.
2019	**Biron, M.**, Córdova, F., & Lemus, A. *Banks' business model and credit supply in Chile: the role of a state-owned bank*. BIS Working Paper No 800.
2014	**Biron, M.**, & Bravo, C. On the discriminative power of credit scoring systems trained on independent samples. In *Data Analysis, Machine Learning and Knowledge Discovery* (pp. 247-254). Springer International Publishing.

Honors

2018	**Anona Thorne and Takao Tanabe Graduate Entrance Scholarship**, *Department of Statistics, UBC*
2018–2021	**Four year doctoral fellowship (4YF)**, *UBC*
	Provided with financial support of at least $18,200 per year plus tuition for up to four years of their doctoral studies
2014	**Becas Chile Scholarship**, *CONICYT*
	For graduate studies abroad (ranked 42 out of 408 recipients and out of 1,384 valid applications)
2006–2010	**Dean's list**, *University of Chile (FCFM)*
	For obtaining a GPA of 5.7 or above (scale ranges from 1 to 7).

Conferences and seminars

Presentations

May-2023 **2023 IRSA Conference—The Fast and the Curious: Modern Markov Chain Monte Carlo**, *Minneapolis, MN*
Automatic regenerative simulation via Non-Reversible Simulated Tempering.

Jun-2022 **2022 IMS Annual Meeting in Probability and Statistics**, *London, UK*
Pseudo-marginal inference for CTMCs on infinite spaces via monotonic likelihood approximations.

Jun-2021 **2021 World Meeting of the International Society for Bayesian Analysis**, *Virtual*
Pseudo-marginal inference for CTMCs on infinite spaces via monotonic likelihood approximations.

Oct-2019 **Composites Research Network + Data Science Institute Research Talks**, *UBC*
Debiasing Monte Carlo Estimators.

2018–present **Multiple Reading Groups**, *UBC*
Regular presentations at groups headed by Drs. Bloem-Reddy, Bouchard-Côté & Campbell.

2018 **Conference on Business Analytics in Finance and Industry (BAFI)**, *Santiago, Chile*
Leveraging Probability of Default Models for Bayesian Inference of Default Correlations

Organization

2020–present **Constance van Eeden Distinguished Visitors Lecture**, *UBC*

Professional Experience

2019–2020 **Senior consultant**, *Applied Statistics and Data Science Group*, UBC
In charge of organizing and holding meetings with clients, and supervising the work of a junior consultant responsible of writing a summary report with our recommendations. Notable projects:
○ Prior Clinical Presentations and Service use Patterns as Predictors of Mortality in The Hotel Study Participants during the 10-year period of Observation
○ Association between time–to–surgery and survival rates of breast cancer patients
○ Assessing reliability of the Heckmatt scale for ultrasound-visualized spasticity-related fibrosis
○ Characterizing brain metastases arising from head and neck cancer
○ Evaluation of Wood-Cement Composites Made with Contaminated Wood Waste
○ Analyzing glaucoma-related patient outcomes after anti-VEGF therapy
○ COPD originates in polluted air: controlled human exposure study to diesel exhaust in COPD

2015–2018 **Financial Stability Analyst**, *Superintendency of Banks and Financial Institutions*, Santiago, Chile
I spent most of my time producing monthly reports with insights regarding potential threats to the financial stability of the banking system. This required processing massive databases with account-level data collected from banks (using SQL) for then analyzing them (using R). I also conducted applied research on the topic of financial stability. Some notable projects:
○ Developing a method for Bayesian inference of default correlations by leveraging probability of default (PD) models
○ Building a systemic risk indicator for retail loans using account-level and macroeconomic data
○ Comparing the performance of statistical learning models for credit scoring
○ Estimating the joint distribution of implicit bank PDs from market transactions of time deposits

2011–2014 **Financial Engineering Analyst**, *CL Group Financial Services Consulting*, Santiago, Chile
I was the lead analyst in a wide array of projects involving quantitative modelling of market and credit risk. Clients were financial institutions, mostly banks. Some notable projects were:
○ Quantifying counterparty credit risk exposure of an interest rate swaps portfolio
○ Developing the market risk framework for a Central Counterparty of OTC derivatives
○ Assessing the credit risk exposure of a government-backed portfolio of student loans
○ Constructing PD models at many banks for credit risk management

Technical Experience

programming	Julia, R, Bash, C/C++, Python, MATLAB, Java, Visual Basic
version control	Git
database	Oracle SQL, Transact-SQL
writing	LaTeX, Microsoft Word
spreadsheet	Microsoft Excel
